

Application Chart

LUBRICATE PROTECT CLEANING (SURFACES) REMOVING OF

Use up to 200°C
Use up to 250°C
Heavy duty
Rust remover
Metal - Plastics (or synthetic material)
Iron - Steel
Rubber
Against dirt
Against oxidation - rust
Against humidity - water
Against diluted acids - alkalis
Against heat
For heavy loads
Glass - tiles
Paint - coatings
Adhesive
Electric contacts
Plastics - PVC
Carpet - fabric - textile
Metal - Aluminium
Rubber
Grease - Oil
Cured silicone - IMS polymer
Uncured adhesive
Cured contact adhesive

Lubricate & Protect

Vaseline Spray 400ml

For door and window hinges, nuts and screws, garden tools, sliding and rolling doors, ...

Transparent lubricating and protective spray. Has a lubricating action on metals and plastics and protects against water and weather conditions, diluted acids and alkalis, and general wear and tear. Can be used at temperatures of up to +150°C. Does not contain silicone.

Silicone Spray 400ml

For sliding doors and rubber seals, rails, electric wiring of cars, engines, lawn mowers, ...

Transparent spray with lubricating and anti-adhesive characteristics based on high-grade silicone oil. Lowers friction and reduces wear of mechanical parts and is ideally suited for light lubrication of plastics and rubbers. Prevents dirt and grease deposits. Creates a water-repellent layer and protects against moisture. Can be used at temperatures of up to +200°C.

PTFE Spray 400ml

For machines, pulleys, (bicycle) chains, gears, ball bearings, conveyor belts, ...

High-grade lubricant based on PTFE to treat metal and plastic parts. Suited for parts which are subject sustained or high pressure and temperature loads. Repels water and dirt. PTFE offers long-life protection against friction and prevents wear. Very good mechanical and thermal stability.

White Grease 400ml

For machines, ball bearings, axles, sprockets, conveyor belts and rubber sealing profiles, ...

High-grade lubricant based on white lithium soap with PTFE for heavy duty applications. Has a double effect: on the one hand it sprays like oil and has penetrating characteristics and on the other hand it sets like grease and has good adhesive properties and good pressure resistance. Can be used at temperatures up to +120°C. Waterproof and protects against corrosion.

Multi Spray 400ml

For screws, bolts, nuts, moving parts, axles, hinges, chains, garden tools, ...

High grade technical aerosol spray with unique 8-fold performance: Rust Remover, Lubricant, Cleaner, Penetrating Oil, Corrosion Protector, Damp Repellent, Contact Spray and Shock Spray. Can be used at temperatures of up to 190°C. Suitable both for metals and for plastics.

Industrial applications

Zinc Spray (matt) 400ml

For coachwork, gutter braces and weld joints, ...

High-grade zinc spray (98% zinc) for cold galvanizing. Protects zinc and unprocessed iron and steel against corrosion. Can be applied directly onto rust. Matt appearance once dry.

Zinc Spray (shiny) 400ml

For coachwork, gutter braces and weld joints, ...

High-grade Alu-zinc spray for cold galvanizing. Protects zinc and unprocessed iron and steel against corrosion. Can be applied directly onto rust. Smooth and shiny appearance once dry.

Contact Spray 400ml

For electric contacts such as switches, batteries, potentiometers, slide and drag contacts, ...

Universal cleaning and maintenance spray for electric contacts. Dissolves dirt and oxides and improves the power transmission at electrical contacts.

Degrip ALL 400ml

For machines, bolts, nuts, flanges, ...

Penetrating oil to loosen rusted and oxidized screws and parts. Its low surface tension allows the oil to penetrate into the smallest cavities and to release metal parts which got stuck.

Cutting Oil 400ml

For drilling, milling, sawing, filing, tapping, turning, planing and punching of steel and most non-ferrous metals.

High-grade oil that prevents overheating of metals during cutting and drilling activities. Reduces the cutting resistance and the mechanical load of the tool.

Cleaning

Cleaner & Degreaser 400ml

For most non porous surfaces (metal, plastics, PVC, ...) and leaves no traces.

Powerful fast-drying cleaner and degreaser for a wide range of operations: suitable for preparation of surfaces before applying adhesives or sealants. Also suitable for the removal of uncured sealants (MS, PU, Silicone), tar, grease and wax.

Sealant Remover 400ml

To use on most surfaces, including aluminium, coatings, laminated board, paint and certain plastics.

A ready-to-use and fast working spray based on terpenes for the removal of cured residues of Silicones and MS Polymer sealants. Trim off as much as possible of the cured sealant with a cutter knife before applying the Sealant Remover.

Adhesive Remover 400ml

Removes fresh glue stains, deans brushes, knives, spatulas ...

Transparent solvent mixture suitable for removing fresh glue stains and cleaning of brushes and other tools used to apply adhesives. Removes also excess contact glue.

Multi Cleaner 400ml

For glass, tiles, mirrors, laminate, PVC, kitchens, car interiors, textile, carpets, office equipment, ...

Water based universal cleaning spray. Foams up when extruded and cleans organic stains. Non drip formulation is ideally suited for vertical applications.

Brake Cleaner 400ml

Brake and clutch parts

Powerful, fast-drying cleaner for brake and clutch parts. Removes excess brake fluid, excess oil, dirt, etc. quickly. Prevents squeaking brakes and clutches from slipping. Easy any angle application, non corrosive.
